

The Bitcoin Bank

Making Bitcoin Easy

<https://bitsafe.io>

Intro

Bitcoin is difficult to use as a payment system and complicated to store securely for the average user.

BitSafe will provide customers with a variety of easy to use payment methods for cryptocurrency that they will be familiar with from traditional banking and modern payment apps.

We will also make it easier for businesses to accept cryptocurrency payments for goods and services online and in store.

Customers will not have to worry about the technical difficulties of setting up paper or hardware wallets securely and devising a complicated backup and recovery system. BitSafe will use the highest security standards and years of experience to make sure our customer funds are kept safe.

Features

BitSafe will allow customers to manage their cryptocurrency portfolio using either the Android/iOS app or via our secure, online web interface.

BitSafe will be available and provide support in multiple languages.

Below is a list of some of the main features and services we will provide:

- Instant and free transactions between BitSafe customers.
- Buy and sell cryptocurrency using credit card or bank transfer.
- A wide variety of payment methods.
- Contactless payments on POS devices and phones.
- Recurring payments.
- Multi-signature accounts.
- Savings accounts.
- Cryptocurrency exchange platform.
- Merchant tools including web integration, point of sale device and E-commerce platform plugins such as Shopify.
- Send to social media accounts including Twitter, YouTube, Facebook and Reddit.

Security

At BitSafe security of user funds is our number one priority.

All funds will be held in off site cold storage wallets.

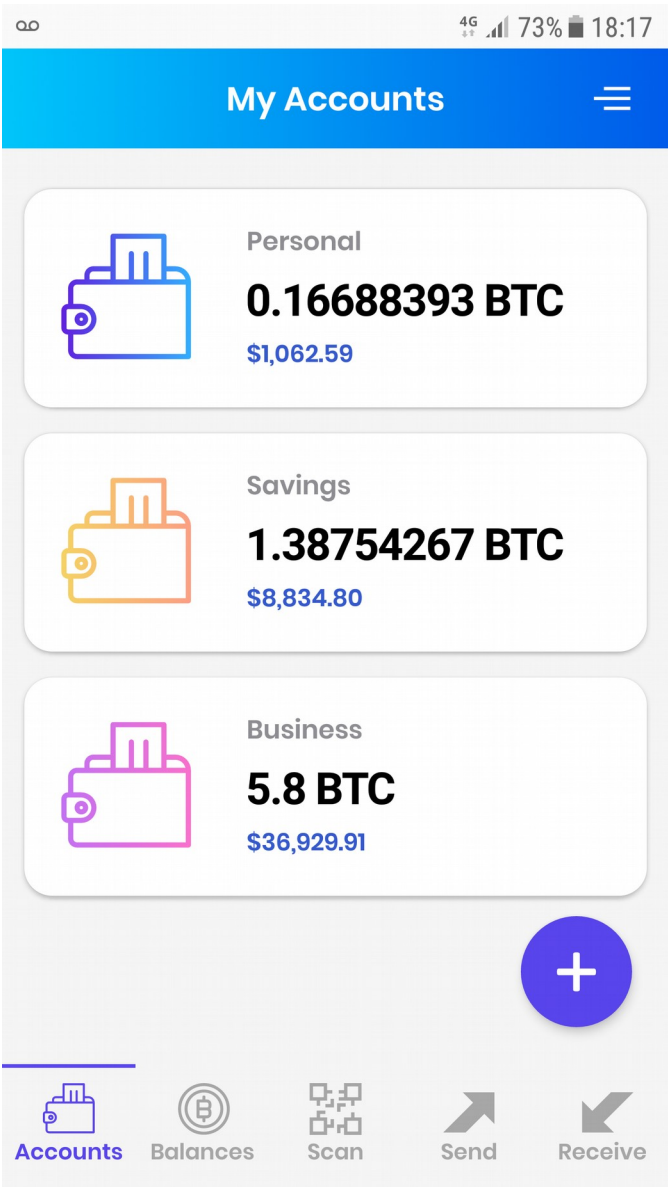

Backups are encrypted and split using Shamir's Secret Sharing technique in multiple, secure geographic locations.

We also provide users tools to keep their accounts secure with features such as two factor authentication, IP address whitelisting and withdrawal address whitelisting as well as complete audit logs of all actions on their accounts.

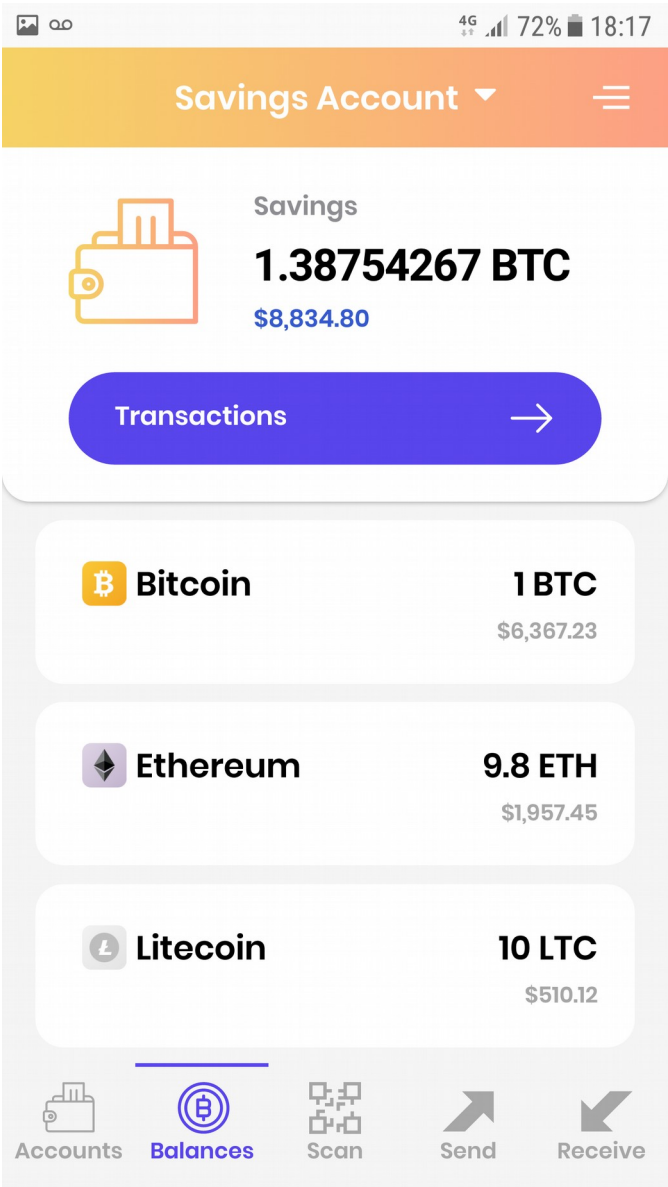

Proof of solvency

Unlike traditional banks we will provide daily anonymised reports of proof of solvency so users can verify their funds are really held by BitSafe.

Revenue Model

BitSafe's revenue will be made from the following sources:

- **Merchant fees**
Merchants using the BitSafe platform to accept cryptocurrency payments in their business will be charged 0.5% on each transaction.
- **Buy/Sell Cryptocurrency**
BitSafe will charge a fee to users buying cryptocurrency with credit card or bank transfer or selling for FIAT to their bank account.
- **Exchange fees**
BitSafe will charge a fee on all trades on the BitSafe exchange platform.
- **Other sources**
In future BitSafe may charge fees on products added after launch such as loans and investments.

BitSafe Coin (BTSC)

We will create our own token called BitSafe Coin. 100,000,000 tokens will be created on the Ethereum blockchain.

60,000,000 tokens will be sold during the ICO crowdsale.

30,000,000 will be retained by BitSafe.

10,000,000 will be distributed to advisors and angel investors.

Token value

BTSC can be used to pay for any fees on the BitSafe platform including but not limited to:

- Merchant fees
- Withdrawal fees
- Exchange fees
- Buying/Selling fees

When using BTSC to pay for fees the user will receive a 50% discount.

Repurchasing Plan

Every quarter we will use 40% of our profit to buy back BTSC and burn them until we buy 60% of all BTSC back.

ICO

The ICO crowdsale will start on the 26th of November and run for three weeks where tokens can be bought on a first come first served basis until 60,000,000 tokens are sold.

Tokens can be bought with Bitcoin, Ethereum or Litecoin.

The token price will increase each week of the ICO

Week	Start Date	Token Price
1	26/11/2018	1 ETH = 1200 BTSC
2	3/12/2018	1 ETH = 1080 BTSC
3	10/12/2018	1 ETH = 1020 BTSC

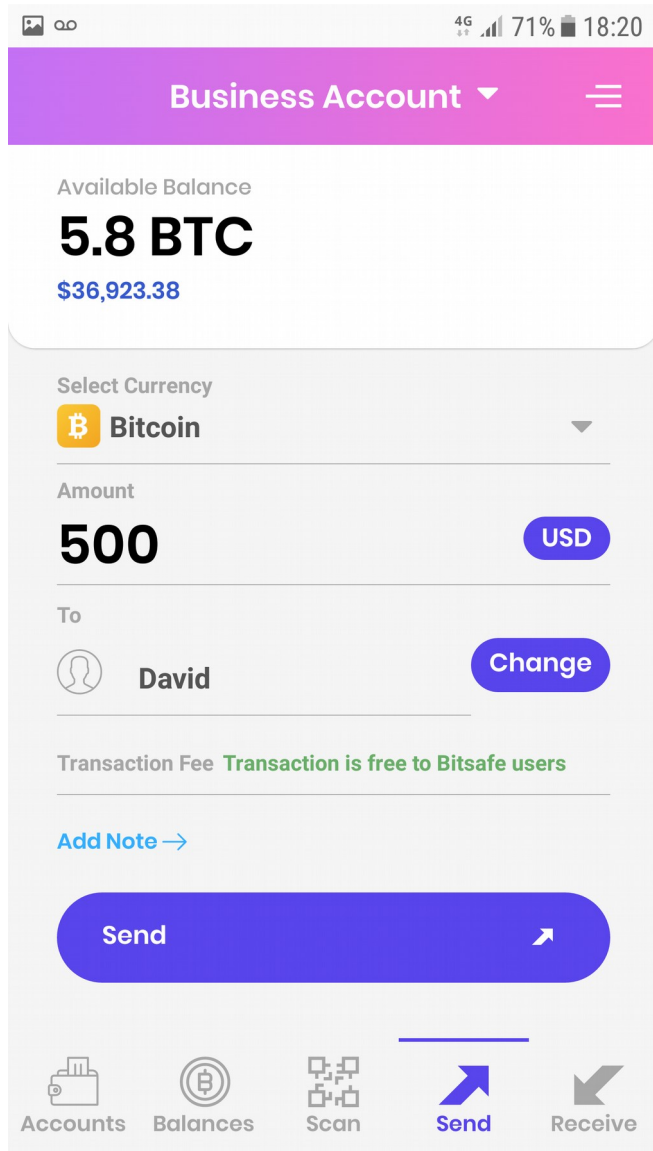

Tokens will be distributed within 1 week of the ICO end date.

Bitcoin and Litecoin price of tokens will be updated in real time based on market prices.

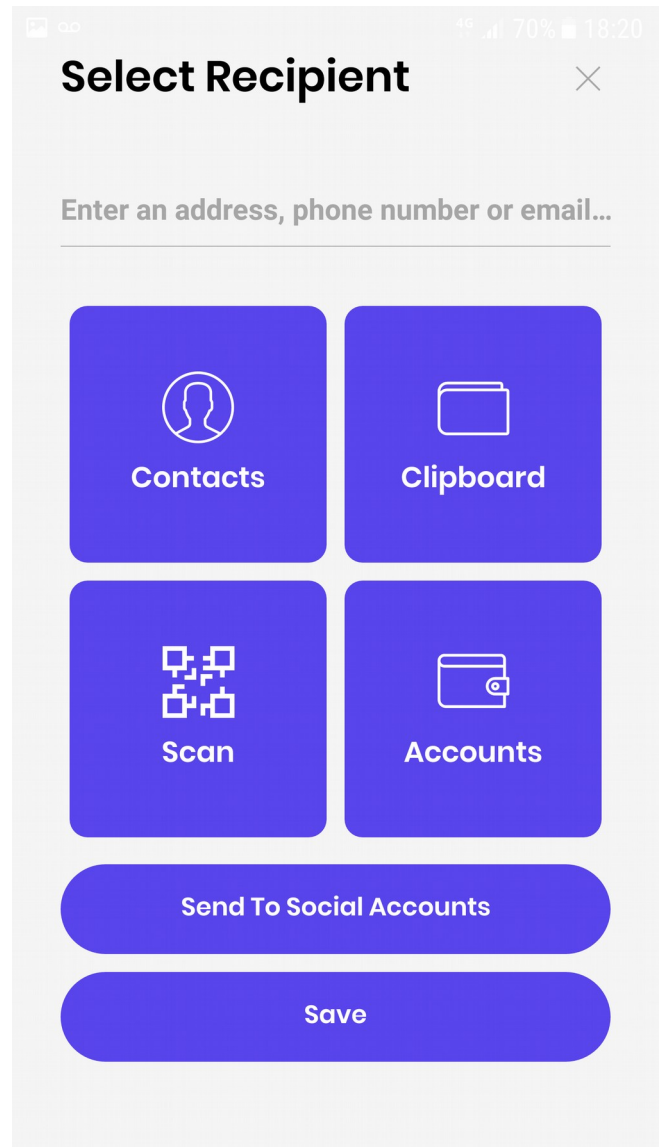

Use of funds

- 50% of funds will be used for marketing and branding to promote BitSafe services and to attract users and businesses to the platform.
- 40% of funds will be used to hire staff including support staff and developers as well as continuous updates to all services and products.
- 10% will be kept for emergency reserves in the event any unforeseen situation arises.
